Abortion/Breast Cancer Business Cards (ABC Cards)

 <p>WHY WASN'T I TOLD?</p> <p>WWW.ABORTIONBREASTCANCER.CA</p>	<p>FACT: Pregnancy causes breast tissue to grow and mature into cancer-resistant, milk-producing cells. Abortion halts this process, and leaves women who choose abortion over childbirth with a greater number of cancer-vulnerable cells and a greater lifetime risk of breast cancer.</p> <p>FACT: Since 1957, over 50 studies link abortion to an increased risk of breast cancer.</p> <p>FACT: In the 1960s, before abortion was readily available, a Canadian woman's lifetime risk of breast cancer was 1 in 20. Now the National Cancer Institute of Canada says it's 1 in 9.</p> <p>ARE WOMEN BEING INFORMED?</p>
